

Project REMS (ReMAP)

Real Estate Management & Analytics Platform

Product Type: Installation-Based Role-Based Enterprise Software

Technology Stack: MERN (MongoDB, Express.js, React.js, Node.js)

Developed By: Digitalness (Registered Indian Digital Marketing & Technology Company)

Project Name: REMS (ReMAP)

Full Form: Real Estate Management & Analytics Platform

Core Concept

REMS (**ReMAP**) is a robust **ERP-style real estate software** designed to streamline operations across Sales, HR, Admin, Telecalling, Reception, and Driver departments. The system empowers management to have complete visibility, control, and commission management across ventures, leads, appointments, and employees.

Feature Modules Overview

Feature Name	Description
Leads Management	Capture, assign, track, and convert leads across roles. Includes follow-ups, lead source tracking, tele-caller outcome logging, and appointment scheduling.
Property Inventory	Manage venture-wise plots. Features: add/edit/delete/view, plot availability status, sold/booked/available visibility by role.
Hidden Inventory	Maintain off-market/priority property list visible only to Rank-S, Admins, and Directors.
Referral System	Track property referrals with source tagging and referral-based commission mapping.
Commission Module	Configure and update commission structures for Directors and Executives on a per-property or sales basis.
Employee Management	Add/terminate staff across departments with approval flows, rank-based access, and profile tracking.
Appointments & Calendar	Schedule site visits, client meetings, and manage appointment outcomes.
Recruitment & Staffing	HR-led hiring and staffing pipeline. Rank-based access to hiring/termination functions.
Attendance & Leave Management	Role-specific check-in, leave requests, approvals, and history.
Cab Booking	Trip requests for Executives & Directors, managed and tracked by Drivers.
Reports & Analytics	Real-time performance dashboards, conversion analytics, department summaries, and commission reports.
Chat Module	Role-based group and personal chat system. Communication history stored.
System Settings	Rank-S/AA control over modules, access levels, workflow configurations.

Role-Based Access & Features

Each role has dedicated dashboards, side menus, and permissions, as outlined below:

Management (Rank-S)

Access Level: Full System Access

Features:

- Approve/terminate any role
- View all properties, leads, commissions
- Configure system settings
- Access to hidden inventory

Dashboard Highlights:

- Overall analytics (Leads, Appointments, Conversions)
- Department performance (Sales, HR, Drivers)
- Commission overview
- Today's appointments snapshot
- Approve/reject leave and termination requests

Side Menu: Dashboard, Reports, Leads Management, Property Inventory, Hidden Inventory, Referral System, Employee List, Appointments, System Settings, Notifications, Chat, Lock Screen

Admin (Rank-AA)

Access Level: Partial System with Property, Lead, and HR Oversight

Features:

- Assign leads
- Add/edit ventures
- Add employees (termination requires Rank-S approval)

Dashboard Highlights:

- Lead assignment stats
- Property listings
- Appointment overview
- Staff summary
- Attendance & leaves (self)

Side Menu: Dashboard, Reports, Leads Management, Property Inventory, Employee List, Commission Distribution, Appointments, System Settings, Notifications, Chat, Lock Screen

Director (Rank-A)

Access Level: Sales Oversight

Features:

- Assign leads to Executives
- Add Executives (termination requires Rank-S approval)
- View commissions

Dashboard Highlights:

- My Leads
- Executive performance
- Cab booking
- Property activity summary
- Attendance & leaves (self)

Side Menu: Dashboard, Reports, Leads Management, Property Inventory (View/Add/Edit), My Commission, Cab Booking, Employee List (Executives, Drivers), Appointments, Chat, Lock Screen

Executive (Rank-B)

Access Level: Sales Execution

Features:

- Manage assigned leads
- Schedule/attend appointments
- View commissions and booking history

Dashboard Highlights:

- My Leads
- Appointments calendar
- Commission snapshot
- Attendance & leaves (self)

Side Menu: Dashboard, My Leads, Property Inventory (View only), My Commission, Cab Booking, Chat, Lock Screen

Tele Caller (Rank-C)

Access Level: Lead Nurturing

Features:

- Follow-up and log outcomes
- Track call performance

Dashboard Highlights:

- Daily call stats
- Assigned Leads
- Follow-up schedule

Side Menu: Dashboard, My Leads, Call Outcomes, Chat, Lock Screen

Human Resource (Rank-D)

Access Level: HR Management

Features:

- Manage recruitment/staffing
- Oversee attendance & leave
- Request approvals from Rank-S

Dashboard Highlights:

- Total employees
- Leave request status
- Recruitment status
- Attendance tracking

Side Menu: Dashboard, Recruitment & Staffing, Leave Management, Chat, Lock Screen

Receptionist (Rank-E)

Access Level: Front Desk

Features:

- Handle walk-ins
- Book appointments

Dashboard Highlights:

- Visitor log
- Appointments summary
- Attendance & leaves (self)

Side Menu: Dashboard, Walk-in Leads, Appointment Scheduler, Chat, Lock Screen

Driver (Rank-F)

Access Level: Trip Fulfillment

Features:

- See assigned bookings
- Log attendance

Dashboard Highlights:

- Cab bookings (Today & Upcoming)
- Assigned trips
- Attendance (self)

Side Menu: Dashboard, My Cab Bookings, Notifications (Booking Only), Chat, Lock Screen

System Highlights

- Scalable for real estate agencies of any size
- Offline-first installation for fast access
- Modular & role-based structure
- Commission tracking & automation
- Custom venture & plot architecture
- Secure internal communication
- Centralized control (Rank-S)

Final Summary

REMS (**ReMAP**) is a powerful *real estate management and analytics software* offering comprehensive control over departments, leads, properties, staff, commissions, and more. Built on the scalable MERN stack and deployed as a managed installation, each client receives a standalone, customized system.

Developed and maintained by Digitalness, this software enables real estate businesses to double productivity and profitability through automation, analytics, and administrative control.
